

SMART, FAST AC CHARGING

THE FUTURE OF EV CHARGING

At Project EV, we specialise in providing only the most cutting-edge electric vehicle charge points, connecting our customers with technology that breaks boundaries. Working towards decarbonisation with renewable energy and electric vehicle charging is at the heart of what we do.

Our goal is to help people finally make the switch to clean and affordable energy by adopting smart charging for electric vehicles. With a wide range of floor and wall-mounted AC and DC electric car chargers, our technology provides you with the high energy output you need to keep your EV charged and running well.

EVA-07S-SE

[The Pro Earth 7.3kW]

The EVA-07S-SE is a single phase AC charging station, packed with features that is ideal for domestic use. This charger comes with a market leading five year warranty, compact design and solar compatibility. This charger also has time shifting capabilities giving you the opportunity to save £100's per year**, a cable lock system for added security, free mobile monitoring app, and a dynamic load balancing system.

With the charger being a pro-earth unit, there is no need for any further protection or the addition of a costly earth spike installation. All the earthing protection is included within the charger as standard.

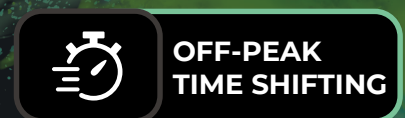

GET YOUR EV CHARGE POINT FOR

£899* inc. VAT

*Get an EV smart home charger installed for a fixed "standard" installation cost of just £899.00 inc VAT.
